

DHRUV KUMAR YADAV

Full Stack Developer (MERN Stack) | 1 Year Experience

Phone: 9179790800 | Email: yadavdhruvo800@gmail.com | GitHub: github.com/dhruvyadav123 |

PROFESSIONAL SUMMARY

Full Stack Developer with 1 year of hands-on experience in MERN stack development, React Native app integration, REST APIs, admin panels, authentication, payment/wallet modules, and real-time chat/call flows. Worked on e-commerce, investment marketplace, and live communication products. Comfortable with API testing, MongoDB schema design, frontend-backend integration, and basic deployment using Render, Vercel, Linux VPS, PM2, Nginx, AWS S3, and FileZilla/SFTP.

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, JavaScript, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js, REST APIs, JWT, RBAC, Socket.io

Database: MongoDB, MongoDB Atlas

Payments & Realtime: Razorpay, Agora, AWS S3

Deployment & Tools: Git, GitHub, Postman, Linux, PM2, Nginx, Vercel, Render

WORK EXPERIENCE

Full Stack Web Developer | Asyscraft Private Limited | August 2025 - Present

- Built and maintained MERN stack features using React.js, Node.js, Express.js, and MongoDB for production applications.
- Developed REST APIs for authentication, profiles, KYC, wallet, payments, transactions, notifications, chat, calls, and admin workflows.
- Integrated frontend and React Native screens with backend APIs, including validation, protected routes, API states, and role-based access.
- Implemented MongoDB/Mongoose models, controllers, services, middleware, validation, and centralized error handling.
- Supported production deployments using Linux VPS, PM2, Nginx, AWS S3, Vercel, and Render.

DEPLOYMENT & SERVER EXPOSURE

- Deployed and tested frontend/backend projects using Vercel, Render, and production environment variables.
- Handled Node.js backend server updates on Linux VPS using PM2 and Nginx, including process restart, log checking, and API health verification.
- Configured AWS S3 based upload flow for images/files and managed cloud storage settings through backend environment variables.
- Used FileZilla/SFTP for secure server file transfer, deployment support, and quick production file updates when required.

PROJECTS

CallBee - Live Chat, Audio/Video Call & Host Platform

Tech: React Native, Node.js, Express.js, MongoDB, Socket.io, Agora/WebRTC, JWT, Razorpay, AWS S3, PM2, Nginx

- Built backend modules for user, host, agent, and admin flows including OTP login, profile management, host availability, KYC, wallet, coin packages, withdrawals, notifications, reports, and support tickets.
- Implemented real-time text chat and call-status handling using Socket.io; connected audio/video call and live-stream flow with Agora/WebRTC channel, token, and UID-based joining logic.
- Worked on wallet deduction, host earning, transaction history, and paid interaction logic for chat, audio call, and video call modules.
- Integrated React Native mobile app screens with APIs for login, home/nearby hosts, chat, call, wallet, profile, permissions, and notification-related flows.
- Tested APIs with Postman and server logs; handled deployment-related work using PM2/Nginx on Linux VPS, AWS S3 for uploads, and FileZilla/SFTP for server file updates.

TamTam Krishi Store - Agriculture E-Commerce Platform |

Tech: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT Auth, Payment Integration, Vercel/Render

- Developed a mobile-first agriculture e-commerce platform for seeds, fertilizers, tools, and farm supply products with category-based browsing and product listing flows.
- Implemented role-based features for admin, vendor, and customer users including product management, order tracking, inventory updates, and dashboard-related screens.
- Integrated payment and order status flows with backend APIs and improved responsive UI for smooth usage across desktop and mobile devices.
- Worked on deployment and API integration using Vercel/Render, MongoDB Atlas, environment variables, and production API debugging.

TokenTraid - Cryptocurrency Investment Marketplace |

Tech: React.js, Node.js, Express.js, MongoDB, REST APIs, JWT Auth, Payment Integration

- Developed marketplace features where users can browse digital token listings, view investment details, and manage investment-related account activity.
- Implemented secure authentication, investor/admin role flows, wallet balance updates, deposit/withdrawal tracking, and transaction history modules.
- Built REST API integrations for dashboards, token listing review, payment actions, and admin monitoring features.

EDUCATION

B.Tech - Computer Science Engineering | LDC Institute, Prayagraj | AKTU University

Diploma - Computer Science Engineering | Govt. Polytechnic Chopan, Sonebhadra
